

Adultwork

How to combat imitation/fake usernames on Adultwork?

Hi, have you had your username falsified on Adultwork?

The most common trick for someone to pull is to switch the "l" with a capital i, eg l.

For example:

Real username: AlisonMatthews

Fake name: AlisonMatthews

On AW they look perfectly the same and you wont be able to tell them apart.

You can report the member for impersonation to AW.

To combat against it ever happening though feel free to create a service seeker account with the false name so you can control it. Once created just forget about it and no-one else will be able to register with that username.

Unique solution ID: #1002
